Bacillus megaterium	8,500,000 CFU per ML
Bacillus pumilus	8,500,000 CFU per ML
Bacillus licheniformis.....	8,500,000 CFU per ML
Trichoderma harzianum	13,000,000 CFU per ML
Trichoderma reesei.....	13,000,000 CFU per ML

- 0.25% Humic Acid from Leonardite
- 0.35% Dextrose (microbe food)
- 0.25% Sucrose (microbe food)
- 0.25% Maltodextrin (microbe food)

Derived From: Hydrolyzed Poultry Manure, Bone Meal, Potassium Sulfate, Hydrolyzed Soy Protein, Hydrolyzed Fish Protein & Kelp Extract.

Directions for Use

We recommend wearing gardening gloves when feeding your plants.

- Shake well prior to mixing with water.
- Add 2-3 doses per quart of water.
- Thoroughly drench the soil around the plant.
- Repeat every 2-4 weeks throughout the growing season.

How to Use Easy Dose

First Use Only: With lid closed, turn bottle upside down to fill spare chamber. Then turn bottle upright again. Follow directions below.

1)FLIP: Flip lid open & turn bottle over.

2)FILL: Fill your watering can with premeasured dose & water. Do NOT squeeze. For another dose, turn bottle up and then over again.

3)FEED: Feed your plants as you water!
